

YOU DEFINING A BETTER

The innovators at Aesthetics Biomedical have launched the worldwide distribution network for The ONIX, leading the industry in patient experiences that produce the most desired results. The ONIX is a high-frequency, electrical surgical device with diverse aesthetic applications that address hyperhidrosis, acne scarring, surgical scarring, skin tightening, minimizing fine lines and wrinkles, and other skin imperfections.

ABM is committed to a comprehensive patient experience during and post treatment, and can be counted on to support you every step of the way with training, data and clinical updates.

We invite you to experience
ONIX today.
